VINEET JAGADEESAN NAIR

jvineet9@mit.edu | vineetjnair9.github.io

EDUCATION

Massachusetts Institute of Technology | PhD in Computational Science & Engineering | **GPA**: 5.0/5.0 *2/21 - 5/25*
Thesis: Coordination of distributed energy resources for a reliable, resilient, and affordable decarbonized grid

Massachusetts Institute of Technology | SM in Computational Science & Engineering | **GPA**: 5.0/5.0 *9/19 - 9/21*
Thesis: Cumulative prospect theory passenger behavioral models for dynamic pricing & transactive control of shared mobility

University of Cambridge | MPhil in Energy Technologies | Gates Cambridge Scholarship | First-Class Honors *9/18 - 9/19*
Thesis: Optimal design & energy management of islanded, hybrid microgrids for off-grid communities in sub-Saharan Africa

University of California, Berkeley | **GPA**: 3.85/4.0 | Dean's Honors List | Phi Beta Kappa *8/14 - 5/18*
B.S. Mechanical Engineering (Honor), B.A. Economics | Distinction | Tau Beta Pi, Pi Tau Sigma, Omicron Delta Epsilon
Minors in Electrical Engineering & Computer Sciences, Human-Centered Design, Entrepreneurship & Technology

Programming: Python, Julia, MATLAB/Simulink, JAX, PyTorch, TensorFlow, Git, LaTeX

RESEARCH EXPERIENCE

Research Intern, | Tata Motors, Pune, India *9/25 - present*
Artificial intelligence (AI)-based advanced motor control algorithms for electric vehicle power converters

Postdoctoral Research Associate | MIT Mechanical Engineering & Schwarzman College of Computing *6/25 - present*

Human Frontier Collective Specialist | Scale AI *6/25 - present*
Evaluating capabilities of large language foundation AI models for control, optimization, and energy system applications

Computational Research Intern | Shell (Shipping & Maritime), London, United Kingdom *9/25 - 12/25*
Applied machine learning, optimization, and geospatial data analysis to reduce ship fuel use, emissions, & methane slip

Research Intern | Catalyst Investment Management, Amman, Jordan *6/25 - 8/25*
Techno-economic analysis & optimization of sustainable AI data centers in Middle East and North Africa (MENA) region

Graduate Research Assistant | Active Adaptive Control Lab, MIT Mechanical Engineering *9/19 - 6/25*
- Applied optimization, game theory, machine learning & control tools to model power grids & electricity markets
- Advised by Dr. Anuradha Annaswamy, thesis committee: Prof. Andy Sun & Prof. Kamal Youcef-Toumi
- Designed new local market structures & algorithms to coordinate & compensate distributed energy resources (DERs)
- Modeled dynamic pricing for shared, mobility-on-demand services using cumulative prospect theory
- Worked with external partners including Ford, Siemens, Shell, GE, PNNL, NREL, Dept. of Energy & Princeton University
- Managed global collaborations with faculty in Portugal, Spain, Switzerland, & Brazil
- Helped with proposal writing & coordination to secure $4 million+ in grant funding from US DOE & MIT Energy Initiative

Visiting Researcher | Universidad Politécnica de Madrid, Madrid, Spain *10/23 - 12/24*
Applied blockchain infrastructure & smart contracts for novel electricity markets & distributed optimization algorithms

Computational Scientist PhD Resident | [Google] X, the moonshot factory, Mountain View, CA *5/23 - 9/23*
- Built improved inverter models & power system simulators for the grid with Project Tapestry
- Scientific, physics-informed machine learning to enhance speed & accuracy of transient dynamic numerical simulations
- Improved stochastic optimization for power system planning with hydro & renewables to study value of battery storage

Graduate Research Intern | National Renewable Energy Laboratory (NREL), Golden, CO *6/22 - 8/22*
Power grid modeling & digital real-time simulation for hardware-in-the-loop validation of optimization/control algorithms

Research Consultant for Innovation Challenge | Avangrid, Orange, CT *5/21 - 8/21*
- Worked with Smart Grid Innovation team to implement distributed energy resources management system (DERMS) pilot
- Developed hybrid, federated software architecture & decision-making method to enhance cybersecurity & interoperability

Research Intern, Artificial Intelligence/Deep Learning for Smart Grids | Siemens, Princeton, NJ *5/20 - 9/20*
Developed bilevel optimization framework & market mechanism for grid integration of distributed energy resources

Graduate Student Researcher | Control Group, Cambridge University Engineering Department *11/18 - 9/19*
Researched optimal design, management, & control of hybrid, islanded microgrids, supervised by Dr. Ioannis Lestas

Honors Undergraduate Researcher | UC Berkeley *1/17 - 5/18*
- Advised by Prof. Duncan Callaway, Prof. Kameshwar Poolla, & Prof. Claire Tomlin
- Designed & prototyped low-cost electricity monitors, scaled up to produce 80+ units for field trials in Nicaragua
- Researched user incentives & programmed sensor networks to optimize usage & improve behavioral energy efficiency
- Studied optimal electric vehicle charge scheduling from a hybrid systems perspective

Cal Energy Corps Research Intern | Academia Sinica, Taipei, Taiwan *6/16 - 8/16*
Increased efficiency of organic, low-cost dye-sensitized solar PV cells 8 to 9%, improved stability through co-sensitization

Undergraduate Research Apprentice | Indoor Air Lab, Civil & Environmental Engineering, UC Berkeley *1/16 - 6/16*
- Investigated temperature effects on airflow patterns & mixing times of gaseous pollutants, under Prof. William Nazaroff
- Independently designed & completed pilot experiment studying ultrafine particle emissions from dust & hot surfaces

PROFESSIONAL EXPERIENCE

AI Fellow | MIT-Pillar AI Collective *1/24 - 6/24*
- Customer discovery to explore commercial applications of my research i(timeseries forecasting & physics-informed AI
- Participated in the National Science Foundation (NSF) Innovation Corps (I-Corps) Spark and Fusion programs at MIT

MIT Delegate & UNFCCC Observer | COP28, Dubai, United Arab Emirates *8/23 - 12/23*
Represented MIT to observe international negotiations at the 2023 United Nations Climate Change Conference

Thriving Earth Exchange Community Science Fellow | American Geophysical Union (AGU) *1/21 - 11/23*
- Worked with scientists, community leaders, legislators, utility representatives, environmental advocates, & local citizens
- Developed greenhouse gas inventory and energy plan for Otsego County, New York

Energy Management Intern at DEW21 (Energy & Water Authority) | Dortmund, Germany *7/18 - 8/18*
Modeled & optimized hourly/daily price forward curves to predict natural gas prices in European markets,

Mechanical & Process Engineering Intern | Applied Materials, Santa Clara, CA *5/17 - 8/17*
- Developed more accurate & cost-effective real-time method for monitoring solid chemical levels inside process chambers
- Drafted 3D models & drawings, collaborated with suppliers to implement alternative sensors & measurement techniques

External Consultant | Electric Power Research Institute & Amazon Web Services *1/16 - 6/17*
- Identified key drivers for H_2 production, storage, transport, & usage for iron & steel decarbonization
- Analyzed technical, financial, & policy issues for battery storage (with renewables) in Amazon data centers

TEACHING & MENTORSHIP

Research Mentorship and Supervision (9/23 – present)
- Danielle Knutsen (MIT undergraduate): Data curation & machine learning analysis for large-scale energy datasets
- Peer Brigger (master's student, ETH Zurich): Assessing true marginal value of batteries in the future decarbonized grid
- Luca Hartmann (master's student, ETH Zurich): Distributed model predictive voltage control with circuit dynamics
- Jose Vargas (MIT undergraduate): Probabilistic forecasting of electricity supply, demand & flexibility with uncertainty

AI Lead Instructor | MIT International Science & Technology Initiatives, Lima, Peru *10/24 - 1/25*
Developed & taught 3-week intensive course on machine learning and data science for early & mid-career professionals

Technical Curriculum Developer & Lead Instructor | MIT International Science & Technology Initiatives *11/23 - 1/24*
Developed & taught high school course on climate change, clean energy & decarbonization in South Africa & Botswana

Data Science Instructor | MIT International Science & Technology Initiatives, Montevideo, Uruguay *11/22 - 1/23*
- Organized 3-week machine learning & entrepreneurship course at Universidad Tecnológica del Uruguay
- Developed & taught interactive lessons on various machine learning topics
- Mentored teams of students & professionals working on diverse startups & research projects

Vineet Nair. "Techno-economic analysis of low-carbon data centers in the Middle East & North Africa." In preparation (2025).
Vineet Nair, Michael Hetherington, & Stephen Brown. "Data-driven approaches to reduce the emissions impacts of global LNG shipping." In preparation (2025).

REVIEWER SERVICE

Journals: IEEE Transactions on Smart Grid, Annual Reviews in Control, IEEE Transactions on Automatic Control, International Journal of Electrical Power & Energy Systems, Energies, Scientific Reports, Reliability Engineering & System Safety, IEEE Transactions on Control of Networked Systems, IEEE Transactions on Control Systems Technology, Communications Engineering

Conferences: IEEE Conference on Decision & Control, Journal of Energy Storage, ACM e-Energy Conference, IEEE International Conference on Automation Science & Engineering, International Federation of Automatic Control World Congress, American Control Conference, NeurIPS Tackling Climate Change with Machine Learning Workshop

HONORS & AWARDS

European Forum Alpbach Scholarship *8/25*
Aarav Amar Bajpayee Memorial Prize for Graduate Student Societal Impact | MIT Mechanical Engineering *5/25*
For excelling in research with societal impact related to the Health of the Planet or Global Energy Sustainability
Sigma Xi Scientific Research Honor Society Full Member *2/25*
Stanford Energy Postdoctoral Fellowship Finalist | Stanford University Precourt Institute for Energy *12/24*
Cyber-physical Human Systems (CPHS'24) Fellowship | International Federation of Automatic Control (IFAC) *10/24*
Stanford University Postdoctoral Recruitment Initiative in Sciences and Medicine (PRISM) award *9/24*
ARPA-e Energy Innovation Summit Student Program Award | US Department of Energy *5/22, 5/24*
National Science Foundation Innovation Corps (I-Corps) Spark and Fusion Grants *5/24*
Conference Travel Grant Award | MIT Graduate Student Council *3/24*
MIT-Pillar AI Collective Fellowship | Pillar VC & MIT Deshpande Center for Technological Innovation *12/23*
Den Hartog Travel Award in Mechanics | MIT Mechanical Engineering Department *1/23*
Out in STEM (oSTEM) Scholarship | Berkshire Hathaway Energy Foundation *10/22*
Best Paper Award: 3rd Place | 54th North American Power Symposium *10/22*
MIT MADMEC Sustainability Challenge: 2nd Place | MIT Materials Science & Engineering Department *10/22*
NREL Workshop on Autonomous Energy Systems Travel Grant | National Renewable Energy Lab *7/22*
Martin Family Society Fellowship for Sustainability | MIT Environmental Solutions Initiative *3/22*
Runner up | MIT Entrepreneurship & Maker Skills Integrator (MEMSI) Hardware Startup Bootcamp *1/22*
International Clean Energy Challenge Winner | Upper Austria *7/19*
Ruhr Fellowship | University Alliance Ruhr & TU Dortmund, Germany *4/18*
43rd Annual Business Today International Conference Impact Challenge Finalist | Princeton University *11/17*
Smart Cities Innovation Collider Winner | Sutardja Center, Pear VC, Bosch, & City Innovate Foundation *4/17*
Dean's Startup Seed Fund Winner | Haas School of Business, UC Berkeley *5/17*

LEADERSHIP, TEAMWORK & ACTIVITIES

Board of Directors Member | MIT Alumnx Pride *4/25 - present*
Finance lead | MIT Global Startup Workshop (GSW), Warsaw, Poland *10/24 - 3/25*
Impact Officer & AI x Climate/Health Project Lead | Global Shapers Cambridge Hub, World Economic Forum *9/23 - 4/25*
Graduate Student Representative | MIT Corporation Joint Advisory Committee on Institute-Wide Affairs *8/22 - 8/23*
Co-President | MIT Energy & Climate Club *4/22 - 5/23*
Content & Operations Team Member | MIT Global Startup Workshop (GSW), Athens, Greece *10/21 - 3/23*
Technical Research Seminar Organizer | MIT International Science & Technology Initiatives (MISTI) *9/22 - 11/22*

Elite Summer School in Robotics, Automation & Entrepreneurship | Innovation Centre Denmark *8/22*
Co-Managing Director | 2022 MIT Energy Conference *5/21 - 4/22*
Co-Director of Applicant Experience | 2021 Climate & Energy Prize (CEP) @ MIT *9/20 - 4/21*
Young Professionals Affinity Group Team Lead | Clean Energy for America (CE4A) *6/20 - 11/20*
Graduate Student Leadership Incubator Fellow | MIT 2019-20 Cohort *9/19 - 9/20*
Engage for Change Fellow | Cambridge Hub & University of Cambridge Environment & Energy Team *1/19 - 4/19*
Undergraduate Student Representative At-Large | The Green Initiative Fund, UC Berkeley *8/17 - 5/18*
Project Manager & Consultant | Bay Area Environmentally Aware Consulting Network (BEACN) *9/15 - 5/18*
