VINEET JAGADEESAN NAIR

jvineet9@mit.edu | vineetjnair9.github.io |

EDUCATION

Massachusetts Institute of Technology | PhD in Computational Science & Mechanical Engineering | **GPA**: 5.0/5.0 *Feb '21 - May '25*
Thesis: Data-driven decision-making algorithms and markets for distributed energy resources in the future decarbonized power grid

Massachusetts Institute of Technology | SM in Computational Science & Engineering | **GPA**: 5.0/5.0 *Sep '19 - Feb '21*
Thesis: Estimating cumulative prospect theoretic passenger behavioral models for dynamic pricing & transactive control of shared mobility

University of Cambridge | MPhil in Energy Technologies | Gates Cambridge Scholarship | First Class Honors *Sep '18 - Sep '19*
Thesis: Optimal design & energy management of islanded, hybrid microgrids for off-grid communities in sub-Saharan Africa

University of California, Berkeley | **GPA**: 3.85/4.0 | Dean's Honors List | Phi Beta Kappa *Aug '14 - May '18*
B.S. Mechanical Engineering (Honors), B.A. Economics | Distinction | Honor Societies: Tau Beta Pi, Pi Tau Sigma, Omicron Delta Epsilon
Minor in Electrical Engineering & Computer Sciences | Certifications in Human-Centered Design & Entrepreneurship & Technology

Programming: Python, Julia, MATLAB/Simulink, Java, JAX, R, PyTorch, TensorFlow, Fortran, Git, STATA, LaTeX

Reviewer for: IEEE Conference on Decision & Control, IEEE Transactions on Control of Networked Systems, Journal of Energy Storage, IEEE Transactions on Control Systems Technology, IEEE Transactions on Automatic Control, International Journal of Electrical Power & Energy Systems, ACM e-Energy Conference, IEEE International Conference on Automation Science & Engineering, International Federation of Automatic Control World Congress, American Control Conference, NeurIPS Tackling Climate Change with Machine Learning Workshop

RESEARCH EXPERIENCE

Graduate Research Assistant | Active Adaptive Control Lab, MIT Mechanical Engineering Department *Sep '19 - present*
- Advised by Dr. Anuradha Annaswamy, thesis committee: Prof. Andy Sun & Prof. Kamal Youcef-Toumi
- Applying optimization, game theory, machine learning & control tools to model power grids & electricity markets
- Designed new local market structures & algorithms to better coordinate & compensate distributed energy resources (DERs)
- Modeled dynamic pricing for shared, mobility-on-demand services using cumulative prospect theory
- Worked with external partners including Ford, Siemens, Shell, GE, PNNL, NREL, Dept. of Energy & Princeton University
- Managed global collaborations with faculty in Portugal, Spain, Switzerland, & Brazil
- Helped with proposal writing & coordination to secure $4 million+ in grant funding from US DOE & MIT Energy Initiative

Visiting Researcher | Universidad Politécnica de Madrid, Madrid, Spain *Oct '23 - present*
- Implement novel electricity markets & distributed optimization algorithms using blockchain infrastructure & smart contracts

Computational Scientist PhD Resident | [Google] X, the moonshot factory, Mountain View, CA *May - Dec '23*
- Built improved inverter models & power system simulators for the grid with Project Tapestry
- Applied scientific, physics-informed machine learning to enhance the speed & accuracy of transient dynamic numerical simulations
- Improved stochastic optimization model for power system planning with hydro & renewables to study value of battery storage

Graduate Research Intern | National Renewable Energy Laboratory (NREL), Golden, CO *May - Aug '22*
- System modeling & digital real-time simulation for hardware-in-the-loop validation of optimization/control algorithms in power grids

Research Intern, Artificial Intelligence/Deep Learning for Smart Grids | Siemens, Princeton, NJ *May - Sep '20*
- Developed a bilevel optimization framework & market mechanism for grid integration of DERs along with demand response

Graduate Student Researcher | Control Group, Cambridge University Engineering Department *Nov '18 - Aug '19*
- Researched the optimal design, energy management, dispatch, & control of hybrid, islanded microgrids, supervised by Dr. Ioannis Lestas

Mechanical & Process Engineering Intern | Applied Materials, Santa Clara, CA *May - Aug '17*
- Developed a more accurate, real-time & cost-effective method for monitoring levels of solid chemicals inside process chambers
- Drafted 3D models, detail drawings, collaborated with suppliers to implement alternative sensors & measurement techniques

Honors Undergraduate Researcher | UC Berkeley *Jan '17- May '18*
- Advised by Prof. Duncan Callaway, Prof. Kameshwar Poolla, & Prof. Claire Tomlin
- Designed & prototyped low-cost energy monitors, scaled up to produce 80+ units for field trials in Nicaragua
- Researched user incentives & programmed sensor networks to optimize electricity use & improve behavioral energy efficiency

- Studied optimal electric vehicle charge scheduling from a hybrid systems perspective

Cal Energy Corps Research Intern | Academia Sinica, Taipei, Taiwan | Berkeley Energy & Climate Institute *Jun - Aug '16*
- Optimized organic, low-cost dye-sensitized solar PV cells to raise efficiency from 8 to 9%, improved stability through co-sensitization

Undergraduate Research Apprentice | Indoor Air Lab, Civil & Environmental Engineering, UC Berkeley *Jan - Jun '16*
- Investigated & modeled temperature effects on airflow patterns & mixing times of gaseous pollutants, under Prof. William Nazaroff
- Independently designed & completed pilot experiment studying ultrafine particle emissions from dust & hot surfaces

PROFESSIONAL EXPERIENCE

Artificial Intelligence (AI) Fellow | MIT-Pillar AI Collective *Jan- Jun '24*
- Customer discovery to explore commercial applications of my research in timeseries forecasting & physics-informed ML for power systems
- Participated in the National Science Foundation (NSF) Innovation Corps (I-Corps) Spark and Fusion programs at MIT

MIT Delegate & UNFCCC Observer | COP28, Dubai, United Arab Emirates *Oct - Dec '23*
- Represented MIT & observed international negotiations at the 2023 United Nations Climate Change Conference of the Parties

Research Consultant for Innovation Challenge | Avangrid, Orange, CT *May - Oct '21*
- Worked with Avangrid's Smart Grids Innovation team to implement a distributed energy resources management system (DERMS) pilot
- Developed a hybrid/federated software architecture & decision-making method for DERMS, to enhance cybersecurity & interoperability

Thriving Earth Exchange Community Science Fellow | American Geophysical Union (AGU) *Jan '21 - Nov '23*
- Worked with scientists, community leaders, legislators, gas & power utility representatives, environmental advocates, & local citizens
- GIS data collection, infrastructure planning, & environmental impact assessment to build an energy plan for Otsego County, New York

Energy Management Intern at DEW21 (Energy & Water Authority) | Dortmund, Germany *Jul - Aug '18*
- Modeled & optimized hourly/daily price forward curves to predict natural gas prices in European markets, five years into the future

External Consultant | BERC Innovative Solutions Consulting *Jan '16 - Jun '17*
- **Electric Power Research Institute**: Identified key drivers for H_2 production, storage, transport, & usage for iron & steel decarbonization
- **Amazon Web Services**: Analyzed technical, financial, & policy issues for battery storage (with renewables) in Amazon data centers

TEACHING & MENTORSHIP

AI/ML Lead Instructor | MIT International Science & Technology Initiatives, Lima, Peru *Oct '24 - present*
- Develop and teach 3-week intensive course on machine learning and data science for early & mid-career professionals in Lima, Peru

Technical Curriculum Developer & Lead Instructor | MIT International Science & Technology Initiatives *Nov '23 - Jan '24*
- Developed curriculum & taught high school course on climate change, clean energy & decarbonization in South Africa & Botswana

Data Science & Machine Learning Instructor | MIT International Science & Technology Initiatives, Montevideo, Uruguay *Jan '23*
- Organized 3-week machine learning & entrepreneurship course at Universidad Tecnológica del Uruguay as part of MIT Global Startup Labs
- Developed & taught interactive lessons on neural networks, advanced deep learning methods, model validation, & hyperparameter tuning
- Mentored teams of students & professionals working on diverse applied ML startups & research projects

Research Mentorship and Supervision | MIT International Science & Technology Initiatives
- Luca Hartmann (visiting master's student, ETH Zurich): Distributed model predictive voltage control with circuit dynamics *Sep '23 - Aug '24*
- Danielle Knutsen (MIT undergraduate): Dataset curation and synthetic data generation for future DER-rich grid studies *Sep '24 - present*
- Jose Vargas (MIT undergraduate): Probabilistic forecasting of DER power injections & flexibility with uncertainty *Sep '24 - Feb '25*

HONORS & AWARDS

Stanford Energy Postdoctoral Fellowship Semi-Finalist | Stanford University Precourt Institute for Energy *Dec '24*
Cyber-physical Human Systems (CPHS'24) Fellowship | International Federation of Automatic Control (IFAC) *Oct '24*
Stanford University Postdoctoral Recruitment Initiative in Sciences and Medicine (PRISM) award *Sep '24*
ARPA-e Energy Innovation Summit Student Program Award | US Department of Energy *May '22, May '24*
National Science Foundation Innovation Corps (I-Corps) Spark and Fusion Grants *May '24*
Conference Travel Grant Award | MIT Graduate Student Council *Mar '24*
MIT-Pillar AI Collective Fellowship | Pillar VC & MIT Deshpande Center for Technological Innovation *Dec '23*
Den Hartog Travel Award in Mechanics | MIT Mechanical Engineering Department *Jan '23*
Out in STEM (oSTEM) Scholarship | Berkshire Hathaway Energy Foundation *Oct '22*
Best Paper Award: 3rd Place | 54th North American Power Symposium *Oct '22*
MIT MADMEC Sustainability Challenge: 2nd Place | MIT Materials Science & Engineering Department *Oct '22*
NREL Workshop on Autonomous Energy Systems Travel Grant | National Renewable Energy Lab *July '22*
Martin Family Society Fellowship for Sustainability | MIT Environmental Solutions Initiative *Mar '22*
Runner up | MIT Entrepreneurship & Maker Skills Integrator (MEMSI) Hardware Startup Bootcamp *Jan '22*
International Clean Energy Challenge Winner | Upper Austria *Jul '19*
Ruhr Fellowship | University Alliance Ruhr & TU Dortmund, Germany *Apr '18*
43rd Annual Business Today International Conference Impact Challenge Finalist | Princeton University *Nov '17*

Robotics Institute Summer Scholars Acceptance | Carnegie Mellon *May '17*
Smart Cities Innovation Collider Winner | Sutardja Center, Pear.VC, Bosch, & City Innovate Foundation *Apr '17*
Dean's Startup Seed Fund Winner | Haas School of Business, UC Berkeley *May '17*

LEADERSHIP, TEAMWORK & ACTIVITIES

Finance lead | MIT Global Startup Workshop (GSW), Warsaw, Poland *Oct '24 - present*
Impact Officer & AI x Climate/Health Project Lead | Global Shapers Cambridge Hub, World Economic Forum *Sep '23 - present*
Graduate Student Representative | MIT Corporation Joint Advisory Committee on Institute-Wide Affairs *Aug '22 - Aug '23*
Co-President | MIT Energy & Climate Club *Apr '22 - May '23*
Content & Operations Team Member | MIT Global Startup Workshop (GSW), Athens, Greece *Oct '21 - Mar '23*
Technical Research Seminar Organizer | MIT International Science & Technology Initiatives (MISTI) *Sep - Nov '22*
Elite Summer School in Robotics, Automation & Entrepreneurship | Innovation Centre Denmark *Aug '22*
Co-Managing Director | 2022 MIT Energy Conference *May '21 - Apr '22*
Co-Director of Applicant Experience | 2021 Climate & Energy Prize (CEP) @ MIT *Sep '20 - Apr '21*
Young Professionals Affinity Group Team Lead | Clean Energy for Biden (CE4B) *Jun - Nov '20*
Graduate Student Leadership Incubator Fellow | MIT 2019-20 Cohort *Sep '19 - Sep '20*
Engage for Change Fellow | Cambridge Hub & University of Cambridge Environment & Energy Team *Jan - Apr '19*
Undergraduate Student Representative At-Large | The Green Initiative Fund, UC Berkeley *Aug '17 - May '18*
Project Manager & Consultant | Bay Area Environmentally Aware Consulting Network (BEACN) *Sep '15 - May '18*

PROJECTS

Selected Programming & Computational Projects | UC Berkeley, University of Cambridge, MIT *Jan '18 - present*

- Implemented novel convex relaxations to solve the mixed-integer power grid reconfiguration optimization problem
- Used natural language processing & deep neural networks for future stock price predictions based on textual news data
- Extended sparse regression techniques to discover partial differential equations & denoised data via dynamic mode decomposition
- Implemented a numerical model in MATLAB to simulate traffic flows on highways & mitigate congestion
- Wrote a finite-element, computational fluid dynamics program from scratch in Fortran to analyze compressible flow through pipes
- Developed finite state machine model based on hybrid systems theory to optimally schedule & coordinate EV charging along highways
- Implemented various Java data structures to build a basic version of Google Maps, an auto grader, & an interactive, 2D game

Selected Controls, Modeling, & Design Projects | UC Berkeley, University of Cambridge, MIT *Aug '14 - May '18*

- Designed & built an automated, voice-controlled coconut processor as part of senior year capstone mechatronics project
- Designed & built a voice-controlled, miniature car using Python, Arduino, & proportional control schemes in negative feedback
- Designed feedback control systems for magnetic levitation & a self-erecting inverted pendulum, implemented via MATLAB/Simulink
- Designed & 3D printed a mini-windmill to maximize structural strength & stability, built control system for optimal power output
- Designed & prototyped versatile, kinetic lighting structures based on tensegrity soft robots with programmable motion & color schemes
